Innovative Triggered Nebulizer Bottle

Rossmax Triggered Nebulizer Bottle (N3) is an innovative two-in-one nebulizer that produces aerosol at user's discretion without taking the continuing-mode aerosol mechanism away from users. N3 helps to have the prescribed medication delivered deep into patient's lungs and stays as patient paced it; most important of all, without medication waste and to achieve a time-saving treatment.

- Your nebulizer kit is intended for use in treatment of asthma, COPD and other respiratory ailments in which an aerosolized medication is required during therapy.
- Single patient use
- Storage temperature range: -4°F to 140°F (-20°C to 60°C)
- Consistent particle size (MMAD) less than 3 μm
- Ergonomic bottle design
- Lock on - continuing mode
Lock off - discretionary operation
- Leak free
- Breath enhance technology (one-way valve)
